RE: July 2008 Intox 8000 calibration checks

On 7-17-08 I performed the calibration check for the two (2) Intoxilyzer 8000 instruments located at the Goodyear Police Department. The serial numbers for those instruments are 80-000312 and 80-001858. I used the approved checklist located on Exhibit G-2 from the Arizona Department of Public Safety.

At the conclusion of the calibration checks, it appeared that both instruments were functioning properly. The printouts from the checks as well as the Exhibit G-2 forms were misplaced and are not available at this time.

Respectfully,

 1123
Jeff Rogers #1123
