

## Chris Bridges Engineering

### Explain what you do:

I'm the transportation planning manager. I do long, mid- and short-term multi-modal transportation planning for increased capacity and safety of the transportation network, which includes all modes of transportation such as roads, bikes, pedestrians and transit on a citywide basis. My initial priority will be to update the city's transportation master plan to help prioritize projects for future construction. I also represent the city on a sub-regional and regional basis for interconnectivity and partnership opportunities and to look for funding options to help fund the construction of our transportation projects.

### Where did you work before:

The Town of Gilbert, and prior to that, the Central Yavapai Metropolitan Planning Organization and Yavapai County.

### Favorite thing about working for the city:

All of the kind and dedicated people who work here.

### Favorite core value:

Innovation, because I am always looking for new or better ways of doing something. This includes looking at future needs and coming up with solutions on how to make those a reality.

**What do you like to do for fun:**  
Play video games or go hiking.

**What did you want to be when you grew up:**  
Baseball player.

**Favorite movie:**  
The Empire Strikes Back

**Dream vacation:**  
Hawaii

**Favorite sports team:**  
Arizona Diamondbacks
